**GREEN
SCORE**

**World's First Construction-Phase
Sustainability and Compliance
Monitoring Platform**

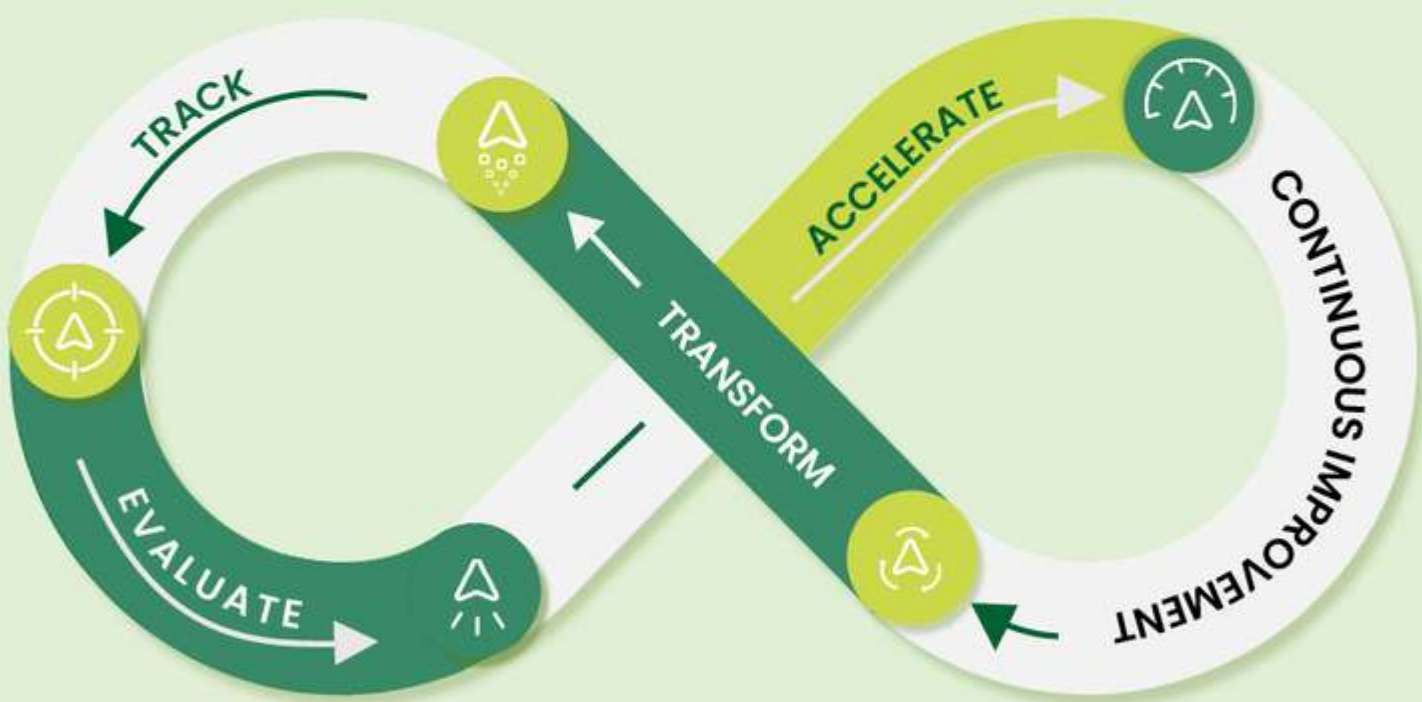

Scan here to become **Ambassador of Green Score**

In today's fast-paced world, Technology is essential for tracking sustainability goals. Green Score offers a revolutionary platform that enables developers and construction teams to actively monitor and improve environmental performance during construction, ensuring projects meet sustainability standards at every stage. Unlike pre- and post-construction tools, Green Score focuses exclusively on the construction phase, making it applicable to projects of all sizes. We are committed to driving environmental change, ensuring regulatory compliance, and promoting transparency in the construction industry. Choose Green Score for a smarter, greener approach to construction.

-  Continual improvement
-  Environmental Risk Minimization
-  Boost efficiency
-  Ensure transparency for internal and/or external
-  Birds-eye view of Project Portfolio
-  Revolution, transformation and upliftment for stakeholders on construction sites

To Track | Evaluate | Accelerate | Continuously Improve | Transform your Project Impact

Why Green Score?

Green Score is World First Construction Phase Sustainability and Compliance Monitoring Platform, that serves all stakeholders in the construction industry, empowering them to navigate the challenges faced on construction site and pave way toward a more sustainable future. In a space where digital compliance is still evolving, Green Score stands alone—not just as the first, but as the only platform purpose-built to monitor ecological impact during the construction phase.

Reduced risk of statutory non-compliances

Smart reporting for Project Benchmarking and Transparency (Investor Reporting, ESG Reporting)

Cloud-based analytics facilitating trend mapping and comparative dashboards

Efficient resource consumption during construction

Hybrid model combining on-cloud SaaS with physical on-site assessments

Capacity Building Ecosystem - we don't just provide software—we build capability

Assurance of adherence to Green Building Certifications (IGBC, GRIHA, LEED, GEM, EDGE etc) and Environmental Clearances norms (6 monthly reporting)

Become a Sustainability Ambassador : Effortless Project Management at Just **₹25,000!**

Ensuring at-a-glance visibility

into the sustainability of your construction site practices

Who We Serve?

Green Score is a unique, one-of-a-kind platform that serves all stakeholders in the real estate and construction sectors, empowering them to navigate the challenges of climate change and lead the way toward a more sustainable future. It transforms complex sustainability data into actionable insights, helping each participant in the construction cycle contribute meaningfully to a low-carbon future.

Builders	Developers
Contractors	Construction Managers
Project Management Company (PMC)	Engineering Procurement & Construction (EPC) Company
Government Sector Project Professionals	Architects
Sustainability Consultants	Environmental Specialists

Our platform helps builders and developers measure and improve the environmental impact of their projects, guides contractors in choosing greener materials and methods, and supports specialists with accurate data for compliance and certification. By connecting all stakeholders through one intelligent system, Green Score transforms sustainability from a challenge into a shared achievement across the entire real estate and construction valuechain.

Become a Sustainability Ambassador : Effortless Project Management at Just **₹25,000!**

Empowering Sustainability
Through Innovation

Benefits We Offer

-  **Streamlined Environmental Impact monitoring & reporting**
(Facilitates ESG, Sustainability Reporting)
-  **Improved Sustainability Performance**
(Meets 6 out of 17 SDG's laid down by UNPCC)
-  **Enhanced Compliance Management**
-  **Cost savings through Resource Optimization**
-  **Data Driven Decision making**
-  **Risk Identification & Mitigation**

Align with 10 out of 17 SDGs laid by UN IPCC (International Panel for Climate Change)
